

A BAG OF YOUR OWN WILL CARRY A LONG WAY

Help reducing waste and littering the environment!

In 2022, 64 plastic bags per person was purchased in Finland. Once in the environment, plastic bags litter the environment, are harmful to waters and animals, degrade slowly and break down into harmful microplastics. In 2016, the Federation of Commerce and the Ministry of Environment signed a voluntary Green Deal agreement to reduce the number of plastic bags to a maximum of 40 per person per year.
